Business Need

Paradeep Phosphates Ltd (PPL) was looking for an expertise who can upgrade their data base and as well as migrate their SAP Application without jeopardizing their business.

EDCS has been trusted IT Partner over the years with Paradeep

The Challenge

PPL had performance and other problems due to older version of hardware, application and databases. Hence decided to upgrade the SAP application and database. Also, to migrate to new hardware with better capacity. PPL wanted expert assistance who can quickly complete the project as they were approaching year end.

The Solution

EDCS quickly decided the upgradation and migration plan based on the prior experience and reusing earlier knowledge base. Developed the resource plan keeping PPL go-live date in mind. Production go-live performed during weekend with very short downtime. The SAP was upgraded to ECC 6 EHP 7 and database to Oracle 11g successfully. EDCS ensured the smoother go-live through hyper care support.

Benefits

- Aggressive project plan and professional management helped to meet the customer target go-live
- Lower impact to users as the production cutover duration was very short
- Lower cost of project due to reuse of knowledge base and expert skills.
- Successfully go-live without any bug/issue
